Love the Titanium Silver color very unobtrusive. Had to connect antennae in order to get all stations you have to buy the antennae. I love Jazz and classical music. The Wave radio has one CD and the multiscd changer holds 3 CDs. Music plays all day, changing from one CD to another. Can change CDs by using remote control eject button have the larger remote that lights up, love it for clarity of seeing and using all options. One negative when changing from one CD to another, you hear a light clattering noise; you would think Bose would come up with a quiet changer, but not yet. I asked if there were wireless speakers available so I could hear the music throughout the home, but was told there are no wireless speakers that would connect to this system. I like the Bose system very much wish there were wireless speakers to pull the music throughout the entire home. BOSE told me to disconnect from power source and reconnect. It finally died completely and guess what square trade said it wasn't covered under the three year warranty. Keep your money. Don't get the warranty. I bought the 3disc add on and wow, it sounds cheap and awful when the discs change. For that reason, I've primarily used the main player. It's no longer under warranty and no way am I paying to get this disappointing piece of equipment fixed.

Hard lesson learned because this wasn't a cheap system when I bought it. It weighs twice what my others Bose radios did! I thought that was a good thing, however, and I like the grey color more than the solid white or black. There is a 30 second update required before connecting the CD stacker, but other wise, no need for instructions. The two plugs in the back were just short connect wires that were easy to plug in. Then the power cord and a CD. While I miss the control panel on the top, I will admit that the remote control is sufficient. I bought one of the larger remotes, because I keep misplacing the credit card sized remote and because there is no control panel on the unit. NOTE I have been buying BOSE audio devices for decades and I love them, however, I can't help but notice that the CD changers on every one of them including the player in my car have all quit within a couple of years. Be prepared to send it back to Bose if that happens. Part of the high price is the

product warranty and they are one of those companies that is easy to work with. Don't forget to Register yours! My Mother enjoys listening to music but has difficulty working the complicated network controls so I bought this unit for her because it seemed simple to operate and the reviews for sound quality were good. After using it today for the first time, I wished that I had gotten a couple of these units for myself and saved all that money putting in a home audio system. This unit has better sound quality because the music is from the CD instead of the MP3 player, and it was very easy to install and operate. Bose did provide software to update the MultiCD changer see another reviewer's comments regarding the older MultiCD changer. The instructions were so clear that we had it up and running in less than 5 minutes. It's also compact enough that it could be moved easily from room to room if desired. This was a very good purchase. It's easy to install and the sound is great.

Got the CD changer and the better bigger and lights up remote and the FM antenna. Except for one time he has found it easy to use and loves the sound. The bigger one is better. Regardless of the price. I had the system for over 10 years and was so very disappointed. I took a chance and ordered this newer system and I am thrilled with it, it gives me much pleasure each and every day. The CD part stopped working but Bose no longer makes these. I have lots of CDs and wanted a way to play them. When I realized I could get a reconditioned system, I was thrilled. It just arrived and works wonderfully. The sound is so nice. It arrived very quickly. I definitely feel it is worth the money and am so happy to have another one.
